1 [Session 14c: program library care and feeding: Program library maintenance and monitoring](#)

John R. Ehrman

 November 1976 **Proceedings of the 4th annual ACM SIGUCCS conference on User services**

Publisher: ACM Press

 Full text available: pdf(551.38 KB) Additional Information: [full citation](#), [abstract](#)

This memorandum describes the organization of the SLAC Triplex Program Library, and the methods to be used for its maintenance. Also described is an important maintenance tool, the Library Monitoring System.

2 [PRIMS: an interactive system for the design of hybrid circuit layout](#)

F. Hadlock

 July 1976 **ACM SIGGRAPH Computer Graphics , Proceedings of the 3rd annual conference on Computer graphics and interactive techniques SIGGRAPH '76**, Volume 10 Issue 2

Publisher: ACM Press

 Full text available: pdf(171.19 KB) Additional Information: [full citation](#), [abstract](#)

PRIMS is an interactive system to be used in the layout of hybrid circuits. The layout involves positioning integrated circuit chips and resistors on a substrate surface. Conducting paths are then defined in order to make interconnections between chips, external connection pads positioned around the edge of the substrate, etc. PRIMS is actually a language which includes commands for defining regions corresponding to integrated circuit chips, and for causing the system to define a tree of conducti ...
